CUTTING SINGLE BITTED (DISC. TUMBLER) KEYS

Drawing shows typical example for cutting single bitted keys from code. Dimensions are shown for reference. Standard Depth Cut keys will assist in cutting keys by numbers.

Cutting Pin Tumbler Keys

Drawing shows typical example of cutting
Pin tumbler keys from code. Dimensions are
shown for reference. Standard Depth Cut keys
will assist in cutting keys by numbers.

DOUBLE BITTED KEYS

The double bitted Code No's are all shown with an "H" prefix, to match the set of code keys. A complete set has 402 keys in the H-2001 through H-2576 series. If you should have an older set of code keys with plain numbers, disregard the "H" prefix as they are the same as the plain number series.

For example:

When cutting a key by code, such as KF-101 (Code 2003), use the corresponding "H" series key H-2003 and cut on a K-4 blank, or other proper blank as indicated by the code sheet.

Code keys are available for double bitted keys in sets of 402 keys per milling.

A set of guide keys is available for single bitted key cutting.

A set of guide keys is available for pin tumbler key cutting.
